

ACKNOWLEDGEMENTS:

Writing this paper allowed for, at times, a nostalgic look back at what was and still is part of an immensely satisfying professional career largely at HERA first in the role of Manager of the New Zealand Welding Centre and then as Director of HERA. In these roles I owe thanks to many colleagues from work and industry, students and overseas experts and it is through these joint efforts that much was achieved. In the context of this paper I specifically would like to acknowledge my long-term colleague Senior Welding Engineer Alan McClintock, NZWC Managers Dr Wolfram Woerner and Dr Michail Karpenko, I&QC Centre Manager Peter Hayward, HERA Structural Division Manager Dr Charles Clifton and previous HERA Directors Gavin Fletcher, Dr Llew Richards and Dr John Meikle. And specific to Australia, my thanks are due to many great contacts over the years but I would like to single out Chris Smallbone with his WTIA team who introduced me to IIW and the endless list of contacts he had amassed over his unique career.
